

EMRx Electromagnetic Receiver App

The IK Trax EMRx App offers a visual representation of the signal from the EMRx Receiver, allowing users to easily monitor signal strength. Additionally the app enables seamless updates to the EMRx unit settings. Available for both Android and Windows, the app allows users to connect via Bluetooth.

Key Benefits

- The visual signal helps streamline the pig locating and tracking process, providing real-time insights.
- Track up to six colour-coded frequencies, as well as magnets, for comprehensive monitoring of your operation.
- Scroll through the chart to see the entire operation, offering a clear and continuous view of the process.
- Place markers on the graph to highlight points of interest and take screenshots for future reference or reporting
- Quickly and easily update receiver settings, such as gain and tracked frequencies, ensuring efficient and convenient configuration.
