**IK TRAX**

4003 Pig Signaller App

The IK Trax 4003 Pig Signaller App provides real-time alerts of any pig passage events, delivering detailed information directly to your device. It also allows you to easily update the parameters on the signaller. Available for Android, the app connects via Bluetooth for seamless operation.

Key Benefits

- Receive pig passage information directly on your device, eliminating the need to watch the signaller's display.

- Avoid entering hazardous areas by receiving information directly on your device, allowing you to monitor from a safer or more convenient location.

- Adjust app settings directly on your device without requiring manual changes on the signaller. Save your preferred settings for quick and consistent setup.

- View a graphical representation of a magnetic pig's signature for enhanced analysis and troubleshooting.
